~ Legend from Ancient Times ~

Descending unto this place...
She came from the sky...
One unto this world.
Trapped alone, she cries.

Let me return home to heaven.
It is where I belong.

Children, please help me.
Children, send me back home.
Children, for this reason you were born.

What is La-mulana?

But if you follow the next four pieces of advice, the road will open spontaneously!

Solve a riddle before your eyes.

You must solve almost all the riddles to solve the mystery of the Ruins. If you solve one riddle before your eyes, you will move one step toward the goal.

Get the items that are hidden in the Ruins!

A lot of mysterious items are hidden in the Ruins. Those enhance the ability of the professor or are necessary to solve the riddles. Let's gather them to widen your scope of activities!

Defeat the Guardians sleeping somewhere!

Postscript

We are engaged in the game for long time.

In an amateur period, we were regarded highly because of releasing this game. When we had turned professional, we concluded smoothly that remaking this game as first work was the best way. Remaking this took two years to complete. One year have passed since releasing WiiWare version in Japan. Remake version for PC have been released at last. La-Mulana returned to PC after long time.

We have not succeeded as indies game developer yet. It is only this game that we entrust our fate, We think. Then, We developed thin game in the best to be evaluated long. Now, we entrust our fate to La-Mulana.

That apart, the pleasures of the making games is listening players' impressions---well players' screams. When we were young, we would often read that game developers said, "I 'm glad to listen players' impressions." About that, we thoght "Don't give a high-sounding talk!" But something we feel in same place as them is "exciting" rather than "gladness".

That is like playing the game with players.

No wonder it's exciting,So, we will play La-Mulana with everyone from now on.

We will be engaged in the game for very long time.
